

Interim Report 2018

Wir begleiten Sie im Leben.

Very good result for the first half of 2018

Zuger Kantonalbank managed to increase profit in the first half of 2018 by 9.5 % to CHF 34.2 million. A key driver of this very good result was higher income from commission business and services. Interest income likewise developed positively. Customer assets recorded a significant rise, while loans to customers also increased. The quality of the credit portfolio remains consistently good.

Zuger Kantonalbank experienced a very healthy trend in its results for the first six months of this year. The operating result came in at CHF 56.4 million, which represents an increase of 14.0% on the prior year, while profit was up by 9.5% to CHF 34.2 million. Total assets rose to CHF 14.8 billion.

Mortgage lending business strengthened further

Compared to the end of the year, mortgage loans rose slightly by 1.2% and amounted to CHF 11.6 billion. Persistently high repayment volumes were more than offset by new property loans, as Zuger Kantonalbank continued to strengthen its position as the leading bank for real estate financing in the Zug business region. The bank is sticking to its prudent lending policy with clearly defined test criteria.

Interest income on track

Margins in the mortgage business have remained virtually unchanged in the ongoing low-interest environment. Favourable longterm refinancing conditions have enabled the bank to cushion low interest rates on new mortgage business. As a result, interest income rose to CHF 76.2 million (prior year: CHF 74.4 million). Customers continued to take advantage of the favourable mortgage rates on offer and renewed maturing loans on a fixed-rate basis.

The sharp increase of CHF 492 million in customer deposits in the first half of the year to a total of CHF 9.6 billion (+5.4%) is primarily attributable to inflows in wealth management that are being consistently invested in securities. As before, in the absence of broad market acceptance we are only passing negative interest rates on to customers in individual cases.

Result from commission business and services up sharply

In commission business and services, the bank posted a very gratifying result of CHF 22.6 million (+16.2% year-on-year). Together with ongoing growth, the strategic measures implemented in the investment advisory and asset management business as per 1 July 2017 have strengthened income sustainably.

Assets under management rose by CHF 634.1 million to CHF 11.9 billion, an increase of 5.6% compared to 30 June 2017. On a performance-adjusted basis, the increase in assets under management since the beginning of the year amounted to CHF 224.4 million.

At mid-year, the result from trading activities stood at CHF 8.7 million, mirroring the result for the first half of 2017.

Cost-income ratio confirms high efficiency

The position "Other results from ordinary activities" has risen to CHF 5.4 million as a result of higher distributions on participations. Personnel expenses remained virtually unchanged (+0.2%). Due to the introduction of new IT solutions, general and administrative expenses rose by 2.7% to CHF 17.3 million. Depreciation declined by CHF 0.5 million year-on-year to CHF 5.9 million. The healthy cost-income ratio testifies to the steadily high efficiency of Zuger Kantonalbank.

Very comfortable equity base

The quality of the credit portfolio remains consistently good. In the first half of 2018, value adjustments for default risks were written back to the tune of CHF 0.2 million. The ratio of available regulatory capital stood at 17.8% at mid-year. This makes Zuger Kantonalbank one of the best capitalised banks in Switzerland.

Abridged Notes

Changes to accounting and valuation policies and any corrections to errors, and their impact on the interim financial statements

There are no changes or corrections to errors to report in comparison with the previous year.

Note on factors which have influenced the bank's economic situation during the reporting period and by comparison with the prioryear period

For comments on the development of business in the first half of 2018, please see pages 2 and 3 of this publication.

Extraordinary income and extraordinary expenses

in CHF 1,000 (rounded)	30.06.2018	30.06.2017	Change
Gains realised from the disposal of participations, tangible fixed assets and intangible assets	14	2	676.5%
Other extraordinary income Total extraordinary income	14	2	676.5%
Total extraordinary expenses			

Material events occurring after the balance sheet date of the interim financial statements

No material events have occurred since the balance sheet date which significantly influence

the bank's assets, financial position and earnings as at 30 June 2018.

Outlook for 2018

The global economic upswing continued in the first half of 2018, despite political uncertainties. The latest sentiment indicators suggest that this development should persist in the second half of the year too. In the US, the normalisation of interest rates is well advanced. The US central bank (Fed) can be expected to raise interest rates further this year. In Europe and Switzerland, central banks are keeping interest rates at a very low level.

Zug real estate market in robust shape

Canton Zug continues to be an attractive place to live and work. As a result, demand for residential property is strong, a situation accentuated by the fact that construction activity has been below average for more than five years now. The Zug real estate market is therefore in very robust shape.

Expanding products and services

Zuger Kantonalbank is working continuously to expand its spectrum of products and services for its customers. In the second half of the year, we will be implementing a new e-banking solution in a phased approach. Thanks to the modern design with various graphic illustration options, a simplified payment execution process, and an improved search function, our customers will be able to conduct their banking business even more efficiently in future.

Good annual result expected

With the introduction of advisory mandates 12 months ago, Zuger Kantonalbank completed its transition from a transaction-based model to an advisory-oriented business model. As the half-year result confirms, this has given the bank an important growth stimulus and ensured a stable flow of income despite financial market volatility.

The above-mentioned introduction has resulted in a base effect in the comparison of the first half of 2018 with the prior-year period. Accordingly, growth in the second half of the year will not prove as strong. Zuger Kantonalbank is expecting to record a good result for the year.
