

Good result for the first half of 2025

Zuger Kantonalbank can look back on a successful first half in 2025. Consolidated profit for the first six months amounts to CHF 70.9 million*, which is 18.3% above the prior-year figure. The growth was achieved in all business areas, underscoring the bank's broad-based profitability. The result is driven in particular by the dynamic development in securities and investment business plus a one-off effect in interest operations.

The first half of 2025 was characterised by a challenging environment. International trade conflicts and a generally downbeat global economy provided for increased market volatility and lacklustre growth. Against this backdrop, Zuger Kantonalbank nevertheless succeeded in further increasing its income and consolidating its market position. By mid-year, total assets increased to CHF 19.7 billion.

Solid development of interest operations – despite pressure on margins

The interest rate cuts by the Swiss National Bank in the first half of 2025 are resulting in greater pressure on margins in the deposit business. Loans to customers were unchanged from the previous year, amounting to CHF 15.6 billion at 30 June 2025. Customer deposits are also stable at CHF 12.9 billion. The bank views this continuity as a sign of the trust placed in it by its clients.

The gross result from interest operations is 5.2% higher at CHF 108.7 million. One-off income of CHF 8.7 million made a positive contribution to the result. Adjusted for this

special effect, the gross result is 3.3% below the prior-year figure. In view of the market conditions, the result can be deemed robust.

In the first half of 2025, the bank made individual value adjustments amounting to CHF 12.9 million, alongside value adjustments for inherent default risks of over CHF 12.2 million. The net result from interest operations is 7.2% higher at CHF 108.0 million.

Clear rise in commission and trading activities

Income from commission and service fee activities is 11.2% above the prior-year figure at CHF 46.2 million. This growth was driven mainly by securities trading and investment activities which increased by CHF 4.2 million (+14.9%) – supported in turn by a persistently high transaction volume. Compared with 31 December 2024, assets under management rose by CHF 0.8 billion to CHF 20.1 billion, around half of which resulted from the market performance.

^{*} All amounts in the report are stated in Swiss francs (CHF).

Trading activities also performed well. The result from trading activities was 16.7% above the prior-year figure at CHF 9.9 million. This increase is due primarily to more activity in foreign currency trading.

Together with the other result from ordinary activities of CHF 3.9 million, the result for the first half of 2025 is operating income of CHF 168.0 million – an increase of 9.0% compared with the prior-year period.

Investments in future topics and efficiency improvements

In the first half, operating expenses amounted to CHF 71.2 million, up 3.6% on the previous year. The increase is due to planned investments in growth and innovation projects. After three years of expansion, the bank thus reports lower cost growth again.

Personnel expenses in the first half rose by CHF 1.5 million, due mainly to the downstream effect of the staff increase in 2024. General and administrative expenses rose by 4.3% to CHF 24.2 million, due in particular to volume-related additional costs for IT services and financial information.

Despite these investments, the cost-income ratio was lowered to 42.2%, an improvement of 1.6 percentage points versus the prioryear period.

Six-month Group profit well above the prior-year level

The operating result, a measure of operating performance, rose to CHF 82.4 million. This is an increase of 16.9% compared with the prior-year period. After deduction of taxes, the six-month Group profit amounted to CHF 70.9 million – an increase of 18.3% versus the prior year.

Outlook

Global economic growth is likely to be below the long-term potential rate for the full year in 2025. Whereas lower key interest rates could shore up the economy over the rest of the year, geopolitical uncertainties, armed conflicts and trade-policy tensions will remain the main risk factors.

Against this backdrop, Zuger Kantonalbank is cautiously optimistic for the second half.

Thanks to its solid position, the bank believes it is in a position to achieve a slightly higher result in 2025 than in the previous year, even in a difficult environment.
