

## Pleasing annual result for 2015

Zuger Kantonalbank has posted a pleasing annual result for 2015. The operating result for the year under review came to CHF 94.1 million. At CHF 61.5 million, profit is slightly higher than in the previous year. The increases in the result from trading activities, in net new money and in real estate financing are particularly noteworthy, as are the substantial cost reductions.

Thanks to the bank's stable earnings performance and comfortable equity capitalization, the annual general meeting of 30 April 2016 will be requested to distribute an unchanged dividend of CHF 175 per share. This means that Zuger Kantonalbank will distribute 82.1% of its profit to its shareholders.

The introduction of new accounting rules has resulted in various changes to the presentation of the annual result. The overall result is no longer stated as the gross profit but as the operating result, which includes value adjustments and depreciation. At CHF 94.1 million, the operating result was well above the previous year's result (CHF 76.9 million), which included a one-off payment to the pension scheme.

### Substantially higher result from trading activities – slight decline in commission business

Trading activities benefited from the increased demand for currency hedging following the abandonment of the minimum euro exchange rate: the result improved significantly to CHF 15.6 million (+39.6%).

At the same time, the result from commission business decreased to CHF 35.5 million from CHF 39.0 million in the prior year. The expected decline in service fee income impacted on the result.

### Positive net new money figure

In 2015, customer deposits entrusted to Zuger Kantonalbank grew by 2.9% to CHF 9.4 billion, while assets under management increased by 4.4% to CHF 10.2 billion. The net inflow of funds in the investment business came to CHF 449 million.

#### Growth in real estate financing

Zuger Kantonalbank was able to strengthen its position in the highly competitive financing market. While risk management remained rigorous, the volume of real estate loans rose by 5.0% to CHF 11.3 billion. Overall, customer loans rose by CHF 493 million to CHF 11.9 billion (+4.3%).

# Interest income only slightly down from prior year

Zuger Kantonalbank posted a net result from interest operations of CHF 150.8 million, down 1.4% from the previous year. Under the new accounting rules, this figure factors in interest-related value adjustments and losses. These remain at the low level of CHF 2.0 million (previous year: CHF 1.9 million).

The negative interest rates have fundamentally altered the interest differentials business. By actively managing its balance sheet and through continued growth in customer loans, Zuger Kantonalbank has succeeded in largely compensating for the adverse effects. At times, refinancing rates have fallen to historic lows.

#### Substantial cost reductions

In 2015 Zuger Kantonalbank reduced its general and administrative expenses by a substantial 5.1%. Personnel expenses were virtually unchanged from the prior year, rising by just 0.3%. As a result, the ratio of costs to income at Zuger Kantonalbank improved to 46.8% (previous year: 47.4%) and is very good on a peer group comparison.

#### US tax issue resolved

In November 2015, Zuger Kantonalbank came to an agreement with the US Department of Justice on settling the tax issues regarding those of its clients classified as US Persons.

The fine payable to the US authorities and the third-party costs incurred in this connection are covered in their entirety by the provisions formed in 2013.

#### Further strengthening of capital

In the year under review, Zuger Kantonalbank strengthened its equity base substantially, increasing it by around CHF 58 million. By doing so, the bank has not only met the new (Basel III) capital adequacy rules but has also met the requirements for an anticyclical capital buffer. The leverage ratio – the ratio of the bank's capital to its total assets – remained unchanged at 7.9%. Disposable regulatory capital saw a further improvement. As of the balance sheet date, it came to 17.1% – a high figure on a sector comparison (previous year: 16.6%). Zuger Kantonalbank thus easily exceeds the minimum legal requirements with regard to both of these ratios.

The entire one-off gain of CHF 10.9 million from the disposal of the stake in Swisscanto has been allocated to the reserves for general banking risks.

#### Provisions for deferred taxes

Thanks to the exceptionally good liquidity situation, Zuger Kantonalbank is able to release the existing provisions for deferred taxes. The bank's prudent provisions policy helps to strengthen its capital base.

The release of provisions frees up CHF 16.5 million, which is now recognized in the income statement under "Taxes". As a result, tax income of CHF 1.9 million is stated. Effectively, however, Zuger Kantonalbank pays regular taxes to the federal government, the canton and the municipalities in addition to settling the deferred taxes of CHF 14.6 million.

#### Healthy return on shares

In 2015, the Zuger Kantonalbank share price rose by 4.7% compared with the previous year to CHF 4,684. In a year of considerable fluctuations on the Swiss equity market (SMI: –1.8%), the share price held up well. Including the dividend of CHF 175 per share, the overall return came to 8.7% in the year under review.

### Bright outlook for 2016

The operating conditions for Zuger Kantonal-bank will remain challenging in 2016. The Swiss National Bank will continue with its policy, introduced one year ago, of applying negative interest to the sight deposits it holds, and interest rates look set to remain very low for a considerable time. The world's financial markets sustained heavy losses at the beginning of the year.

Zug remains a robust and attractive business location. The real estate market in the Zug business region is encouragingly immune to economic upheavals around the world, and continues to grow – albeit less rapidly than in previous years. Prices are stable at a high level. Thanks to this environment – and while retaining its cautious lending policy – the bank will be able to continue growing and to expand its loans volume.

Zuger Kantonalbank is also aiming for continued growth in its investment business. During the current year, the bank will work intensively to adjust the business model applicable to investment clients. The aim is to introduce advisory mandates in order to transition from a transaction-oriented to an expense-based business model.

Zuger Kantonalbank is confident that it is moving in the right strategic direction, and takes an optimistic view of the future.

The bank and its employees look forward to welcoming clients back to its newly opened head office at Postplatz, Zug, on Monday 4 July 2016.

#### New accounting rules for banks

As of 1 January 2015 the "Accounting rules for banks" (ARB) came into force. These require a number of changes to the presentation of the annual results, especially with regard to balance sheet structure and to income statement items. This means, for example, that operating result rather than gross profit is stated; consequently, the latter also includes value adjustments and depreciation and thus corresponds to the "subtotal" previously stated. Furthermore, prior-year figures have been restated to reflect the accounting rules now applicable.
