

Information about the execution of securities transactions by Zuger Kantonalbank

1 Objective and purpose

The following is intended to inform clients about the Bank's procedures for ensuring the best execution of client orders relating to the acquisition or sale of securities and other financial instruments.

By providing this information, Zuger Kantonalbank is implementing the regulatory provisions in Switzerland (Federal Act on Financial Services, FinSA). It strives to ensure the best execution of client orders.

Zuger Kantonalbank's Custody Account Regulations set out the basic principles that apply to securities transactions.

2 Scope of application of best execution

2.1 What does best execution mean?

Best execution requires the Bank (or third parties, such as brokers, etc.) to institute all appropriate measures that are needed to achieve the best possible result for clients, in terms of both price and quality, when executing the clients' orders.

2.2 Application of best execution

The requirement of best execution of client orders applies to the execution or transmission of orders which the client issues to the Bank for the purpose of acquiring or selling the following financial instruments (this list is not exhaustive):

- Listed shares, rights
- Exchange-traded funds (e.g. ETF or real estate funds)
- Bonds and money market instruments
- Securitised derivatives
- Structured products
- Non-securitised and standardised forward contracts and options traded on a stock exchange (ETD)

The requirement of best execution also applies when the Bank, in the fulfilment of its obligations under an

asset management agreement with the client, acquires or sells financial instruments on behalf of the client.

2.3 No application of best execution

The Bank is not bound by the requirement of best execution in the following cases:

- Primary market transactions
- Explicit instructions by the client that the best execution requirement shall not apply or cannot be upheld

3 Important information about the Bank's securities trading procedures

3.1 Service hours for order placement

Telephone orders can be given to Zuger Kantonalbank between 8.00 a.m. and 5.45 p.m.

Orders via electronic channels can be placed around the clock.

3.2 Order execution / forwarding to the respective trading platforms

Orders are forwarded to the respective trading platforms between 8.00 a.m. and 5.45 p.m.

Outside these hours it is possible that a client order cannot be forwarded in a timely manner to the stock exchange in question. The same applies outside the trading hours of the Swiss stock exchange.

3.3 Orders with a countervalue of more than CHF 500,000

As of a countervalue of CHF 500,000 per transaction (TRX), order execution is automatically blocked for security reasons and the order is not transmitted directly to the stock exchange in question.

Outside service hours, this may mean that the transaction will only be forwarded for execution on the next official working day.

Bilateral agreements concerning trading in securities and trading conventions between financial institutions or with professional clients (FinSA) may result in different conditions being applied.

Furthermore, the opening hours of the relevant trading platforms or trading systems must be taken into account.

3.4 Execution venues

The Bank executes client orders for specific financial instruments at the following venues:

- Stock exchanges and regulated markets
- Multilateral trading facilities (MTF)¹
- Organised trading facilities (OTF)²
- Market makers
- Brokers and other providers of liquidity

The principal execution venues by security type are listed in the following overview (this list is not exhaustive):
